

Find Your First Tech Job

A Guide for finding your first tech job

By: Matthew MacRae-Bovell

I'm Matthew

- CS @ Carleton, Started 2018
- Government, Startups, Freelance, Big Tech, & More
- 4 Years of Experience Before Graduation

Year	Fall	Winter	Summer	Results
2018 - 2019	5 Courses 	5 Courses 	0 Courses 	10 / 40 Courses 4 Months Experience
2019 - 2020	5 Courses 	5 Courses 	0 Courses 	20 / 40 Courses 16 Months Experience
2020 - 2021	1 Course 	2 Courses 	2 Courses 	25 / 40 Courses 2+ Years Experience
2021 - 2022	3 Courses 	2 Courses 	2 Courses 	33 / 40 Courses 3+ Years Experience
2022 - 2023	2 Courses 	1 Course 	0 Courses 	36 / 40 Courses 4+ Years Experience
2023 - 2024	1 Course 	(current) 		

Should have graduated here

* Note: Years of experience is a bad metric, what you "actual" worked on is what matters

“No one going into university really knows what they’re doing - and that’s ok.”

Ultimately, you’re going to university to some day get a job - but it’s hard to know what the workplace is truly like.

It is your responsibility to do your best to figure out what job will bring you the most fulfillment and happiness.

“What is an Internship and why do they matter?”

- Gives you a better idea of what you want to do when you graduate
- Exposure to the difference between industry, school, and academia
- Exposure to different skills, domains, and development ecosystems
- You can “test” a workplace before you commit to several years
- Start gaining “years of experience”
- They act as an extended Interview

Am I really qualified yet to work?

Yes.

Don't sell yourself short.

“Ok so ... how do I land my
first tech job?”

It's All About Funnels

You don't have to do all these things, but the more things you do will increase your chance of finding a job.

Agenda

- **Workplaces**
- **Reading Postings**
- **Finding Postings**
- **Networking**
- **Resumes**
- **Interviews**

Workplaces

Core Factors Of Judging a Job

- **Organization Level**
 - **Size**
 - **Values**
 - **Mission / Market**
- **Team Level**
 - **The Project**
 - **Structure**
 - **The People**

What you can see from the outside...

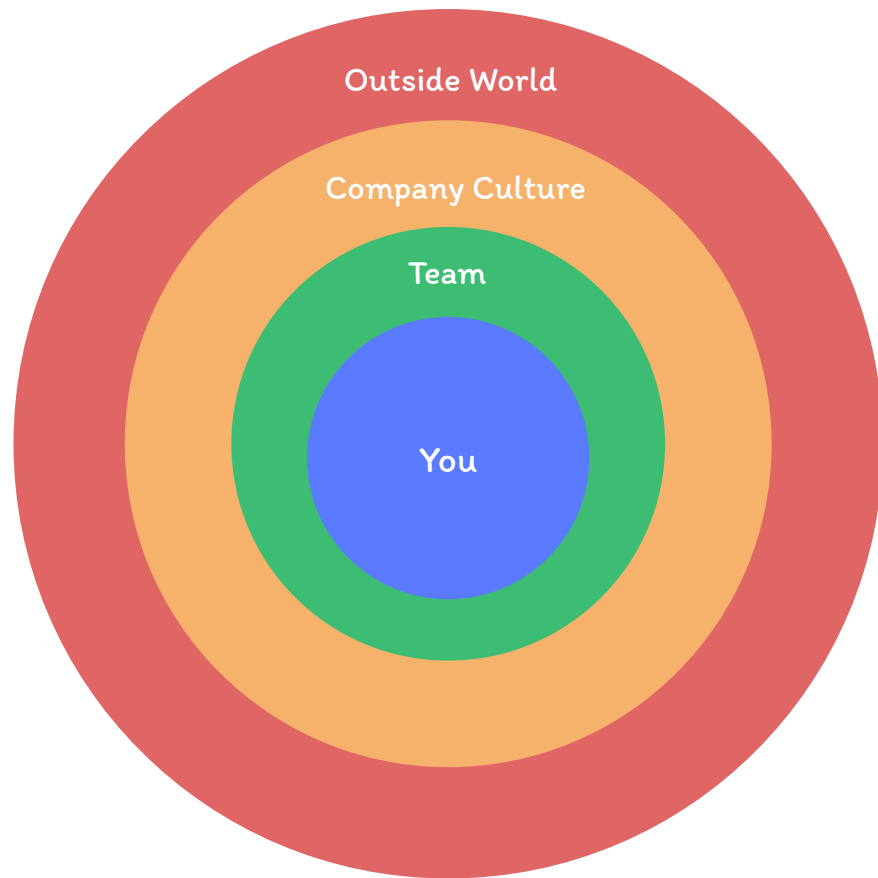

What won't know till your first day...

The “Dream Company” Fallacy

Despite some companies seeming like great places to work, it's ultimately the people you work with that will have the most impact on your experience.

“Onion of Influence”

Organization Size

- **How “specific a job is”**
 - Bigger → want more niche people
 - Smaller → want people with more breadth
- **Bureaucracy & Flexibility**
 - Bigger → more bureaucracy
 - Smaller → less bureaucracy
- **More vs less job security**
 - Bigger → more security
 - Smaller → less security

Organization Type

- **Technical vs Non Technical Institution**
 - Technical = better developer experience
- **Government vs Private Companies**
 - Benefits + Job Security
 - Gov does not want to maintain “tools”
- **B2B vs B2C**
 - Depends on the market
- **Product Focus?**

Your Team

- **The Project / Work**
 - Contract work vs long spanning projects
- **Team Structure**
 - Horizontal vs Vertical Teams
 - How involved are UX, business, client, etc.
- **Team Dynamics**
 - Rituals & ritual Frequency
 - Who writes acceptance criteria?

In Reality, Every Job is Unique

Despite all these factors, these are only really generalizations and every organization varies in how much they do or don't align with these notions.

Reading Postings

Internship vs “Co-op”

“Must be in an accredited Canadian cooperative education program”.

Usually indicates you need to be in a co-op program so that institution can receive a **tax break**.

Apply **anyways**, just know that it may not work out.

Key Posting “Components”

- **Duration** - Term Length, Full-time, etc
- **Position Title**
- **Responsibilities**
- **Location**
- **Salary*** - Transparency is a good sign

Term Lengths

4 months

Can be very short, you might not get to experience as much

You can often ask to extend

I've **personally** found my learning peaks around 4 months

8-16 months

More likely to be given ownership

If you dislike the work or environment, you're stuck

Will appear more **significant** after you graduate

Job Titles

- **Software Developer**
 - Generic, assumes you'll be doing some form of "development"
- **Backend**
 - "Business Logic", not view related
- **Frontend**
 - View related
- **Fullstack**
 - Backend + Frontend
- **Web Designer / Web Master / Web Developer... when people add Web to the title**
 - Gives me the vibe I'm about to basically just do generic HTML, CSS and JS

Job Titles

- **“Data Scientist”**
 - Doing Math, finding trends in data, may involved developing tooling related to touching that data
 - AI and ML is a subset, but usually applied machine learning is a separate title
- **Business Analyst / IT Analyst**
 - “Analyses” out what the business needs, writes up specifications for the developers, writes metric reports, title is honestly vague whether it will have development
- **Quality Assurance / Automation / Testing**
 - Manually testing or writing automation tests for other people's code

Job Titles

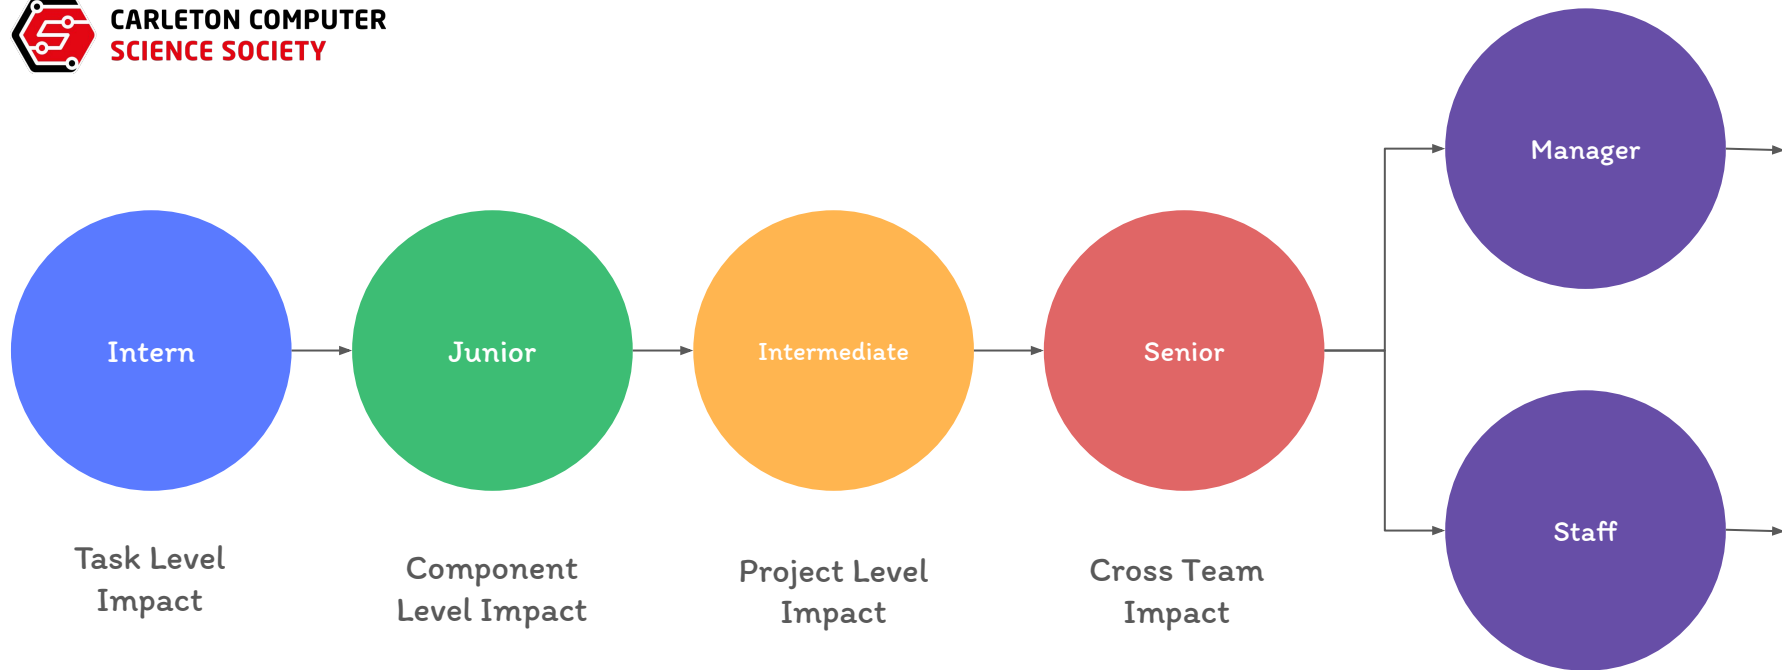

- **“DevOps”**
 - DevOps = Developer Operations, CI / CD
 - “IT for Developers”
- **Production / Infrastructure / Site-Reliability / Cloud Developer**
 - “Keeps the application running”
 - Usually concerned with system infrastructure, scalability, deployment, etc.
- **Data Engineering**
 - Use or build tools for organizing and or analyzing data
 - “Software Development for Data People”

Job Titles

- **Product Manager**
 - Determine priority of development tasks, usually every team has one
- **Product Designer, UI / UX**
 - Mockups, wireframes, prototypes of the desired interfaces, not necessarily implementing them with code

Project has many Components, Component has many Tasks

Not Sure What Skills a Company Looks For?

Check their full-time postings.

You'll likely use the same tech as full-time employees.

Finding Postings

When To Search for Internships

Summer

- Summer is the **most** competitive term (few people are in school)
- August - March

Fall

- The **least** competitive term (everyone's going back to school)
- May - July

Winter

- More competitive than Fall
- September - November

*** In reality you kind of never stop looking...

Where to Search - Surface Level Options

Co-operative
Education
CARLETON UNIVERSITY

Title Permutations + location

- Software Developer Intern
- Developer Intern
- Software Intern
- Software Developer co-op
- Developer co-op
- Software co-op

Dean's Summer Research Internships

- Work with professors to conduct research
- Requires a **CGPA of 10**
- Requires you to inquire with profs on your own

Federal Student Work Experience Program

- Adds you to a job bank for different departments within the Government of Canada
- Lets you list your field interests

<https://www.cscareers.dev/>
<https://discord.com/invite/cscareers>

Carleton Co-op

Co-op Jobs Portal

			2021 - Summer	106595	Full Stack Developer Student	BlackBerry	Human Resourc

Pros and Cons

- **Pros**

- Easier Job searching
- Access to co-op only postings

- **Cons**

- You can only turn down one job
- You can't turn down interviews
- Course is not tailored
- Term reports - 10+ page report
- Fees

Talk to Your Co-op Student Advisors

- Make sure to ask your Co-op student advisors lots of questions
- Co-op is different from just applying for another term of courses so make sure you well set up for it
- Also contact them for fishy things

Elliott Godin

Co-op Student Advisor- BEng
(Comms, CompSys, Software)

[Full Profile](#)

Suzanne Knight

Co-op Student Advisor - BCS

[Full Profile](#)

An Example... Health Insurance In Co-op

- If your co-op is in the Fall term, your health insurance isn't automatically renewed
- Make sure to apply yourself before the deadline or else you won't be covered

	Coverage from Sept. 1, 2023 – Aug. 31, 2024 (for undergraduate students taking fewer than 4 courses)	Coverage from Jan. 1 – Aug. 31, 2024 (for new Winter Term students only)
Total	\$179.87	\$119.92
Health Plan	\$105.88	\$70.59
Dental Plan	\$73.99	\$49.33

International Students and Co-op

- Ask Carleton's International Students Service Office for info
- You need a co-op work permit to work and it can take up to 3 months
- Make sure to also apply for SIN

 International Student Services Office

 - Gemalto
 - Gemalto is an international digital security company providing software applications, secure personal devices such as smart cards and tokens, and managed services.
 - Top Languages: Go Java Python C# Smarty
- ** Real example from Matthew's first year**

Helpful Career Fair Advice

- You are going to the event to **“impress”** not to “learn”.
 - You should already know the kinds of positions they’re hiring for
 - You’re going to shake the recruiters hand
- **Do not** ask the company **“what they do”**... you should already know
- **Do not** say “I’m **first year** standing”
 - Understand you are competing with upper-year students
- Take **interest** in working at their company
 - Show you actually care by saying something like “I’ve heard {x} is the leader in {y}”

Learn to Sell Yourself

Sell yourself one way to the recruiter and another way to the developer.
The recruiter is looking to tick off boxes - say you know those skills.

“Hi my name is {name} and I have a background in {x,y,z}. I’ve heard great things about {something that show you care} at {company}, and was interested in applying and learning about your upcoming student positions”.

LinkedIn

Why LinkedIn Matters

- **Recruiters / Interviewers will look**
 - After career events
 - When they see your resume
- **You can look them up...**
 - The modern version of handing your resume in by hand
 - Less effort than an email / cover letter / follow up
- **Your activity “raises you” in recruiter search results**

Matthew MacRae-Bovell • 11:19 PM

Hi [redacted]! My name is Matthew and I'm a computer science student who would love to intern with [redacted]. I'm currently searching for a Software Developer co-op for the upcoming summer and fall terms. I'm experienced with Ruby on Rails, React and Java. I would love to chat if you're free!

Matthew MacRae-Bovell (He/Him) · 3:00 PM

Hello! my name is Matthew MacRae-Bovell and I'm a 2nd-year Carleton computer science student. I just saw your post about Kinaxis attending the Waterloo career fair, and was wondering if Kinaxis was planning to come to Carleton and when Kinaxis normally starts hiring students for the summer.

OCT 2, 2019

[Redacted] **CHRP** (She/Her) · 9:04 PM

Hi Matthew. We are attending Day 1 of Carleton University's Fall Career Fair on Wednesday October 16th from 10am – 3pm in Alumni Hall – Athletics Centre. We start posting to Carleton in January 2020 for summer coops. See you in a couple of weeks!

Another Example...

APR 6

Matthew MacRae-Bovell (He/Him) · 10:52 AM

[Redacted] a! I just saw your post regarding a role working on Zapier's Runner team and I'm very interested! I currently work on Shopify's automation platform "Shopify Flow" where I've worked on both our core engine and developer platform. Would love to connect and learn more about the role!

[Redacted] (He/Him) · 10:

Hey Matthew, I wanted to acknowledge your impressive skill set and express my appreciation for your interest in our team at Zapier. Allow me to provide you with a brief overview of the Runner team.

Our team is responsible for one of the core systems at Zapier and consists of 5 engineers, 1 product manager, and 1 engineering manager in the AMER timezone (ET, CT, and PT). We're looking for a new team member to fill [Redacted] position, with an ideal start date in May 2023. The team is looking for

Resumes

“Objective” Resume Advice

- **SAR = Situation. Action. Result.**
 - What did you do? What skills did you use? What came of it?
- **Make sure your resume scans and prints**
 - Two Columns Might not parse as well as single column
 - Some resume parsers try to read horizontally
- **Grammar + Spelling Check - Just do it...**

More Resume Advice

- **“Just look at what everyone else is doing”**
 - Find the resume of a student who got into a company you want to work for, you can infer what factors helped them land the job
 - [r/csMajors ...](#) (or equivalent)
 - You can find a few hundred or so resumes to scan on the weekly resume roast threads
- **Don't take advice from just one person**
 - Taking raw resume advice (especially from other students) is hard to filter

Even More Resume Advice

- You can't please everyone: keep it general for general applying, tailor if you care more
- Good formatting, spacing, etc. - shows you pay attention to detail
- Keep multiple resumes tailored to different applications
- Don't oversaturate your skills - probably doesn't apply if you're 1st or 2nd year
- Maximize space ~ Broken lines look gross and waste space ... reword your points until they fit

Resume Office Hours

Get 1-on-1 feedback from accomplished computer science students

January 8th

2:00 - 5:30 PM EST, HP 4125

January 9th

2:30 - 6:00 PM EST, HP 4125

January 10th

2:00 - 5:30 PM EST, HP 4125

“What do I put on my resume if I don’t have anything?”

- **Projects** - great way to show experience with technologies without having paid experience
 - Could be an app, game, website, or anything you’ve built that is relevant to the job!
 - Don’t have any projects? - Word your school work into projects
 - Yes, this is dangerous because recruiters are going to see the same projects
 - Don’t have any projects from school? - Copy a Youtube tutorial / project (self learning)
- Add extra-curriculars
- Add Interests
- Have really pretty spacing. Make it minimalistic.

Interviews

- **OA - Online Assessment**
 - Take home project challenge
 - Time-based code challenge
- **Behavioral "HR" Interview**
 - Communications skills
 - Culture Fit
- **Technical Interview**
 - Algorithms
 - OOP Questions
 - System Design

What is the Interviewer looking for? (Depends)

- If you someone they'd want to work with
- If you actually care about the work
- If you have a strong desire to learn
- How you communicate your ideas
- Some level of technical skill
- "Well rounded people"

Check Reddit and Glassdoor
for previous interview
experiences.

Obligatory LeetCode Slide

- You can't just do "8 hours of LeetCode"
- When I used to care about LeetCode, I did 1 problem a day and would attempt the problem again 1 week later to make sure I still understood it. Sort by difficulty, acceptance.
- I find LeetCode isn't that crucial for jobs at the local level
